Veridex (VDX) Whitepaper

Veridex is a decentralized reputation and identity platform built on the BNB Smart Chain. It empowers users to build trust through on-chain activity, reputation scores, and community validation using the VDX token.

Token Information:
- Name: Veridex
- Symbol: VDX
- Network: BNB Smart Chain
- Token Address: 0x0c45184F127A5105D195062a57C40422f469f6d5
- Total Supply: 10,000,000 VDX
- Decimals: 18

Token Allocation:

Category	Percentage	Allocation (VDX)	Wallet
Liquidity Pool	10%	1,000,000	Wallet_Liquidity
Team (vesting)	20%	2,000,000	Wallet_Team
Community / Staking / Airdrop	20%	2,000,000	Wallet_Community
Reserve	20%	2,000,000	Wallet_Reserve
Marketing / Partnerships	10%	1,000,000	Wallet_Marketing
LP2	20%	2,000,000	Wallet_LP2

Platform Features:
■ **Create ID:** Users create a decentralized ID by connecting a wallet.
■ **Earn Reputation:** Each interaction (e.g., completed task, vote, rating) increases a user's reputation.
■ **Use of VDX:** Used for rewards, reputation markers, or governance.
■ **DAO Governance:** VDX holders vote on community decisions.
■ **Verification:** Optional identity or reputation verification via third-party APIs.

Roadmap (First 6 Weeks):
Week 1: Confirm token structure, deploy to testnet
Week 2: Deploy to mainnet, verify on BscScan, prepare wallets
Week 3: Launch MVP website (React), MetaMask connect
Week 4: Buy domain + email, launch info@ and support@
Week 5: Medium/Twitter creation, community growth begins
Week 6: Announce launch date, add liquidity (1M VDX + 2 BNB), begin staking development
